

Science for Better Nutrition

Our Credo

By sharing science based information and education, the Institute fosters "Science for Better Nutrition" to contribute to the enhancement of the quality of people's lives all over the world.

Our Mission

The Nestlé Nutrition Institute shares leading science based information, education with health professionals, scientists and nutrition communities in an interactive way.

Our Nutrition Resources

Scientific Workshops and Satellite Symposia | Medline listed Publication Series | Academic Fellowships & Nutrition Courses | E-learning & Practical tools | Online Conferences

Give Your Child A Great Start In Life

For children aged 1-3 years

Not all proteins are the same. The latest science proves that partially hydrolysed protein can reduce allergy risk¹, as well as support good growth & development.

NANKID® OPTIPRO® HA 3 uses **Nestlé's Most Advanced Protein™** to help you build strong foundations for your child. It contains:

- **Partially Hydrolysed Protein**
 - Easier to digest
 - Less allergenic**
- **47% increase in DHA & ARA*****
- **100 million probiotics******

*Source: Euromonitor International Limited; company shares by global brand owner, per the aggregate of dried baby food, prepared baby food and toddler milk formula (for children 13 months onwards) definitions, retail value rsp, data published June 2015.

vs normal cow's milk protein *vs previous formulation ****average 100g milk powder daily contains 100 million *Bifidobacterium Lactis* probiotics

IMPORTANT NOTICE: The World Health Organisation recommends exclusive breastfeeding during the first 6 months of life and continued breastfeeding for as long as possible. As babies grow at different paces, health professionals should advise the mother on the appropriate time when her baby should start receiving complementary foods. NANKID® OPTIPRO® HA 3 and NAN® Grow 3 are formulated milk powders for children aged 1 year and above. Not suitable for use as breast-milk substitute.
